

Artist Statement

The palm tree directs the eye to the waterfall. The sound of falling water at various heights ends in a trickle into the misty pond. Residue from the rising mist on the top left frames the shape of the bridge on the lower right giving the viewer an opportunity to walk on the arched bridge exploring the view of the pond formed by the waterfall and streaming under the flat bridge. The flat bridge guides the viewer to exit the artwork. The viewer exits with a sense of the overall serenity and peace expressed in the painting.
